Choose an Instructor for CS 2450 - (Letter you Chose)

Professor Faisal

Professor Mike

Professor Smith

Professor Night Rider

Back

The list of professors gets populated by a list of professors from the DB from some table called Professors.

For this table each record probably looks something like this:

```
{  
  broncold: String  
  name: String  
  address: String  
  phone: OPTIONAL String  
  dob: String  
}
```

Each element in the list gets populated from the “name” value
